Fat-Blasting Meal Plans

by

Jayson Hunter, RD, CSCS

The following 12 fat blasting meal plans are the result of over 10 years of experience helping people just like you lose weight fast. The foods are laid out for you and all you have to do is determine the number of grams of protein you are to receive for your bodyweight as well as the number of carbohydrates. You will eat 1 gram of protein per pound of bodyweight divided equally amongst your meals on each day. Your carbohydrate intake on your high carb day is really no limit except you need to eat your protein, vegetables and fruit before you eat other starches. Only eat until satisfied and not full. On your low carb days eat only 1 gram of carbohydrate per pound of bodyweight divided amongst 4 of your 6 meals. Your no carb day is your normal 1 gram of protein per pound of bodyweight and all the vegetables you feel comfortable eating until satisfied for each meal.

You can split your protein and carbohydrate grams up so that you have equal amounts at each meal that allow carbs and protein if you'd like. Feel free to season your meats and fish anyway you'd like as long as it is calorie free. Enhance your meals by adding your favorite spices to your food."

Additionally, as I have mentioned previously, supplementation is a critical component to your success. The meal plan examples include the specific brand and products I recommend.

Prograde Nutrition's EFA Icon is the highest quality essential fatty acid product you can buy.

And Prograde Workout Drink not only maximizes your fitness efforts and accelerates your fat loss, it also tastes great! Prograde Longevity is an extraordinarily powerful anti-aging antioxidant supplement. If you're looking for convenient and powerful nutrition for your busy lifestyle, you want to look into Prograde Lean Meal Replacement Shake and our Organic Dark Chocolate Prograde Cravers bars. Lastly, I have also included their VGF 25+ for Men & Women, which is a whole foods based multi which ensures you are meeting all your body's nutritional demands. It's made from 25 vegetables, fruits and greens and is specifically designed for women. You won't find a higher quality or more pure source of complete nutrition anywhere on the market.

Please feel free to pass these meal plans on to anyone you feel they will help!

Hi,

My name is Jayson Hunter. I'm the author of these Fat Blasting Meal Plans.

As a registered dietitian and personal fitness trainer with over ten years of experience, I've seen just about every gimmick, fad diet and miracle pill people have tried to lose inches fast. And while these "solutions" have worked for the short-term, they've resulted in long-term disaster by wreaking havoc on the metabolism of these unsuspecting people. In fact, not only do they gain the weight back they lost, but they gain a whole lot more!

This isn't some fad diet filled with nonsense. Everything I reveal to you is based on hard science and research. As a registered dietitian I know what works and what doesn't. I'm not some run-of-the-mill "guru" who pretends to have all the answers. I'm not some well meaning person on an internet forum who wants to help you out. No, I'm a highly educated professional with real-world experience. I have all the right answers because I do the research and I spent all the years in school.

Jayson Hunter RD, CSCS is a registered dietitian, weight management expert and personal trainer with over 10 years of experience. His nutritional programs have helped hundreds of clients successfully get in shape and create permanent lifestyle changes.

Jayson's method of eating and nutritional programming gets results with every type of client regardless of their body type and goals. The keys to successful nutrition are understanding your needs and providing the necessary tools to be successful. Society's nutrition problems are not necessarily a result of bad genetics, but rather a result of bad choices and decisions.

Jayson Hunter, RD, CSCS
